

Amendments to the Specification:

Please replace the Specification filed on May 4, 2005 with the enclosed Substitute Specification.

Applicant has enclosed:

1. Marked-up copy of Substitute Specification; and
2. Clean copy of Substitute Specification

The Substitute Specification is being filed to correct a translational error in the specification as filed. More specifically, the phrase "Medium-Chain Acyl-CoA Dehydrogenase" is being replaced with "Middle-Chain Acyl-CoA Dehydrogenase" throughout the specification. This amendment does not change the meaning of the original phrase as filed. Therefore, the Substitute Specification adds no new matter.
